Understand the Weather

Wind-Chill

- •30° is *chilly* and generally uncomfortable
- •15° to 30° is *cold*
- •0° to 15° is *very cold*
- •-20° to 0° is **bitter cold** with significant risk of **frostbite**
- •-20° to -60° is *extreme* cold_{and} frostbite is likely
- •-60° is *frigid* and exposed *skin will freeze* in 1 minute

Heat Index

- •80° or below is considered *comfortable*
- •90° beginning to feel *uncomfortable*
- •100° *uncomfortable*and may be *hazardous*
- •110° considered dangerous

All temperatures are in degrees Fahrenheit

Child Care Weather Watch

Watching the weather is just part of the job for child care providers. Planning for playtime, field trips, or weather safety is part of the daily routine. The changes in weather require the child care provider to attend to the health and safety of children in their care. What clothing, beverages, and sun screen are appropriate? D ress children to maintain a comfortable body temperature (warmer months - j ightweight cotton, colder months - wear layers of clothing). D rinking beverages helps the body maintain a comfortable temperature. Water or fruit juices are best. Avoid high sugar content beverages and soda pop. Sunscreen may be used year around. Use a sunscreen labeled as SPF-15 or higher. Apply sunscreen generously and frequently. R ead the label of the sunscreen product. You can also use sunscreen to block harmful rays from the sun. L ook for sunscreen with UVB and UVA ray protection. H ave children play in shaded areas or create shade in the play area.

Condition **GREEN** - Most children may play outdoors and be comfortable. C hild care providers should watch for the child that becomes uncomfortable while playing outdoors.

INFANTS AND TODDLERS Infants/toddlers are unable to tell the child care provider if they are too hot or cold. The infant/toddler may become fussy when uncomfortable. Infants/toddlers tolerate shorter periods of outdoor play. Dress infants/toddlers in lightweight cotton or cotton-like fabrics during the warmer months. In cooler or cold months dress infants in layers to keep them warm. Protect infants from the sun by using sunscreen and playing in shaded areas. Give beverages while playing outdoors.

YOUNG CHILDREN Use precautions regarding clothing, sunscreen, and beverages. Young children need to be reminded to stop play and drink a beverage and apply more sunscreen.

OLDER CHILDREN Use precautions for clothing, beverages, and sunscreen. The older child needs a firm approach to wearing proper clothing for the weather (they may want to play without coats, hats or mittens). Apply sunscreen and give beverages while outdoors.

Condition YELLOW means the child care provider must <u>use caution and closely observe</u> the children for signs of being too hot or cold while outdoors. Clothing, sunscreen, and beverages are important. Shorten the length of outdoor time. INFANTS AND TODDLERS Child care providers should use the precautions outlined in Condition Green. Clothing, sunscreen, and beverages are important. Shorten the length of time for outdoor play.

YOUNG CHILDREN Use the precautions regarding clothing, sunscreen, and beverages. Younger children may insist they are *not* too hot or cold because they are enjoying playtime. Child care providers need to structure the length of time for outdoor play for the young child.

OLDER CHILDREN Use precautions for clothing, sunscreen, and beverages. Use a firm approach to wearing proper clothing for the weather (they may want to play without coats, hats or mittens), applying sunscreen and drinking liquids remain important while playing outdoors.

During condition **RED** most children should not play outdoors due to the health risk.

INFANTS/TODDLERS should play indoors and have ample space for large motor play.

YOUNG CHILDREN may ask to play outside and do not understand the potential danger of weather conditions.

OLDER CHILDREN may play outdoors for very short periods of time. Child care providers must be vigilant about proper clothing, beverages, and use of sunscreen

Child Care Weather Watch was produced by the Iowa Department of Public Health, Healthy Child Care Iowa. This guide was produced through federal grant (MCJ19T029 & MCJ19KCC7) funds from the US Department of Health & Human Services, Health Resources & Services Administration, Maternal & Child Health Bureau. F or questions about health and safety in child care contact the Iowa Healthy Families line telephone 1-800-369-2229. W ind-Chill and Heat Index information is from the National Weather Service.

Understand the Weather

The weather forecast may be confusing unless you know the meaning of the words used by your weather forecaster.

- Blizzard Warning: There will be snow and strong winds that produce a blinding snow, deep drifts, and lifethreatening wind chills. Se ek shelter immediately.
- Heat Index Warning: How hot it feels to the body when the air temperature (in Fahrenheit) and relative humidity are combined.
- Relative Humidity: The percent of moisture in the air.
- **Temperature:** The temperature of the air in degrees Fahrenheit.
- Wind: The speed of the wind in miles per hour.
- Wind Chill Warning: There will be sub-zero temperatures with moderate to strong winds expected which may cause hypothermia and great danger to people, pets & livestock.
- weather Advisory: Winter weather conditions are expected to cause significant inconveniences and may be hazardous. If caution is exercised, these situations should not become life threatening.
- Winter Storm Warning: Severe winter conditions have begun in your area.
- Winter Storm Watch: Severe winter conditions, like heavy snow and ice are possible within the next day or two.
